Visualizing Molecular Unidirectional Rotation with High-harmonic Generation

Wednesday 3 July 2019 14:45 (15 minutes)

An angle-resolved high-harmonic spectroscopy is demonstrated to probe the molecular unidirectional rotation. The rotational dynamics is directly visualized from the time-delay-dependent angular distributions and frequency shift of the generated harmonics.

Authors: Dr HE, Lixin (Huazhong University of Science and Technology); Prof. LAN, Pengfei (Huazhong University of Science and Technology); Dr WANG, Baoning (Huazhong University of Science and Technology); Dr HE, Yanqing (Huazhong University of Science and Technology); Dr WANG, Feng (Huazhong University of Science and Technology); Prof. CAO, Wei (Huazhong University of Science and Technology); Dr ZHANG, Qingbin (Huazhong University of Science and Technology); Dr ZHU, Xiaosong (Huazhong University of Science and Technology); Prof. LU, Peixiang (Wuhan Institute of Technology)

Presenter: Prof. LAN, Pengfei (Huazhong University of Science and Technology)

Session Classification: High-harmonic spectroscopy of molecular processes
