Ultrafast Mapping of Coherenct Dynamics and Density Matrix Reconstruction in Terahertz-Assisted Laser Field

Friday 5 July 2019 12:15 (15 minutes)

Using a phase-locked combination of XUV and terahertz fields to probe the dynamics of the system, we propose that the time-evolved density matrix can be reconstructed from photoelectronic spectra with the ultrafast coherent processes resolvable.

Authors: Dr ZHANG, Yizhu (Shanghai Advanced Research Institute, Chinese Academy of Sciences); Dr YAN, Tian-Min (Shanghai Advanced Research Institute, Chinese Academy of Sciences); Dr JIANG, Yuhai (Shanghai Advanced Research Institute, Chinese Academy of Sciences)

Presenter: Dr YAN, Tian-Min (Shanghai Advanced Research Institute, Chinese Academy of Sciences)

Session Classification: Mapping of ultrafast quantum dynamics in solids and liquids
