Light-Wave Magnetization Dynamics

Thursday 4 July 2019 09:00 (15 minutes)

We experimentally demonstrate direct optical control and switching of magnetization in solids with unprecedented sub-femtosecond time resolution. The reported results open the doors to a new generation of Petahertz spintronic devices.

Authors: Mr SIEGRIST, Florian (MPI of Quantum Optics); Ms GESSNER, Julia A. (MPI of Quantum Optics); Dr OSSIANDER, Marcus (MPI of Quantum Optics); Dr DENKER, Christian (Universität Greifswald); Mr CHANG, Yi-Ping (MPI of Quantum Optics); Mr SCHRÖDER, Malte C. (MPI of Quantum Optics); Dr GUGGENMOS, Alexander (MPI of Quantum Optics); Mr CUI, Yang (Ludwig-Maximilians-Universität München); Dr WALOWSKI, Jakob (Universität Greifswald); Ms MARTENS, Ulrike (Universität Greifswald); Dr DEWHURST, John K. (MPI of Microstructure Physics); Prof. KLEINEBERG, Ulf (Ludwig-Maximilians-Universität München); Prof. MÜNZENBERG, Markus (Universität Greifswald); Dr SHARMA, Sangeeta (MPI of Nonlinear Optics and Short Pulse Spectroscopy); Dr SCHULTZE, Martin (Ludwig-Maximilians-Universität München)

Presenter: Mr SIEGRIST, Florian (MPI of Quantum Optics)

Session Classification: High-harmonic spectroscopy and generation in solid materials
