Tracking the Phase Transition in VO_2 using High Harmonic Spectroscopy

Thursday 4 July 2019 09:15 (15 minutes)

We investigate the dynamics of the insulator-to-metal phase transition in VO_2 with high temporal resolution using a new method of time-resolved high harmonic spectroscopy in a solid-state system, revealing all electronic states involved.

Authors: HADDAD, Elissa (INRS-EMT); Dr BIONTA, Mina (INRS-EMT); Dr GRUSON, Vincent (INRS-EMT); LEBLANC, Adrien (INRS-EMT); Dr LASSONDE, Philippe (INRS-EMT); CHAILLOU, Jérémie (INRS-EMT); ÉMOND, Nicolas (INRS-EMT); OTTO, Martin R. (McGill University); SIWICK, Bradley J. (McGill University); CHAKER, Mohamed (INRS-EMT); LÉGARÉ, François (INRS-EMT)

Presenter: HADDAD, Elissa (INRS-EMT)

Session Classification: High-harmonic spectroscopy and generation in solid materials
