XUV-Assisted High-Order-Harmonic-Generation Spectroscopy

Monday 1 July 2019 18:15 (2 hours)

High harmonic generation is analyzed in an intense IR- and weak XUV- fields. Multiple plateaus in harmonic spectra are discussed in terms of XUV-assisted multiphoton photorecombination cross section (PRCS). Multi-photon PRCS retrieving procedure is suggested.

Authors: Dr SARANTSEVA, Tatiana S. (Voronezh State University); Dr FROLOV, Mikhail V. (Voronezh State University); Dr MANAKOV, Nikolai L. (Voronezh State University); Dr VVEDENSKIY, Nikolai V. (Institute of Applied Physics); Dr SILAEV, Alexander A. (Institute of Applied Physics); Prof. STARACE, Anthony F. (The University of Nebraska)

Presenter: Dr SARANTSEVA, Tatiana S. (Voronezh State University)

Session Classification: Poster session 1
