Detecting and Characterizing the Nonadiabaticity of Laser-Induced Quantum Tunneling

Wednesday 3 July 2019 18:00 (2 hours)

We propose and demonstrate a novel scheme to detect the nonadiabatic behavior of tunnel ionization studied in an attoclock configuration, without counting on the laser intensity calibration or the modeling of the Coulomb effect.

Authors: LUO, Siqiang (Huazhong University of Science and Technology); Dr LIU, Kunlong (Huazhong University of Science and Technology); Dr LI, Min (Huazhong University of Science and Technology); LI, Yang (Huazhong University of Science and Technology); FENG, Yudi (Huazhong University of Science and Technology); DU, Baojie (Huazhong University of Science and Technology); ZHOU, Yueming (Huazhong University of Science and Technology); LU, Peixiang (Huazhong University of Science and Technology); BARTH, Ingo (Max-Planck-Institut für Mikrostrukturphysik)

Presenter: LUO, Siqiang (Huazhong University of Science and Technology)

Session Classification: Poster session 2
