## **Nanojoule Water Window Soft X-ray Harmonics Source**

*Monday 1 July 2019 18:15 (2 hours)*

We obtain over 3.5 nJ water window soft x-rays by high-order harmonic generation (HHG), which is the strongest in ever reported results by HHG. X-ray absorption fine structure (XAFS) at Carbon k-edge is observed.

**Authors:** Dr FU, Yuxi (RIKEN); Mr NISHIMURA, Kotaro (RIKEN); Dr XUE, Bing (RIKEN); Prof. SUDA, Akira (Tokyo University of Science); Prof. KATSUMI, Midorikawa (RIKEN); Dr TAKAHASHI, Eiji J. (RIKEN)

**Presenter:** Dr FU, Yuxi (RIKEN)

**Session Classification:** Poster session 1
