Towards Intense Isolated Attosecond Pulses by Waveform Synthesis

Wednesday 3 July 2019 18:00 (2 hours)

A waveform-synthesized field obtained by frequency mixing of a Ti:S laser with a 1257-nm OPA is used to drive high harmonic generation. The measured and simulated spectra as a function of delay show similar features.

Authors: AUTUORI, Alice (LIDYL, CEA Saclay); Dr TURCONI, Margherita (LIDYL, CEA Saclay); PLATZER, Dominique (LIDYL, CEA Saclay); CHENG, Yu-Chen (Lund University); Dr ALEXANDRIDI, Christina (LIDYL, CEA Saclay); HERGOTT, Jean-François (LIDYL, CEA Saclay); Dr TCHERBAKOFF, Olivier (LIDYL, CEA Saclay); Dr BOROT, Antonin (LIDYL, CEA Saclay); Dr GISSELBRECHT, Mathieu (Lund University); Dr HAESSLER, Stefan (ENSTA-CNRS-Ecole Polytechnique); Dr SALIÈRES, Pascal (LIDYL, CEA Saclay)

Presenter: AUTUORI, Alice (LIDYL, CEA Saclay)

Session Classification: Poster session 2
