## Universal Pulse Characterization Method for a Multi-octave Wavelength Range from UV to IR

*Wednesday 3 July 2019 18:00 (2 hours)*

A universal pulse characterization method that can be applied for a multi-octave wavelength range from UV to IR without having a duration limit is presented. The validity of the method is verified theoretically and experimentally.

**Authors:** Mr CHO, Wosik (Institute for Basic Science / Gwangju Institute of Science and Technology); Dr HWANG, Sung In (Institute for Basic Science / Gwangju Institute of Science and Technology); Dr IBRAHIM, Heide (INRS-EMT); Dr BIONTA, Mina (INRS-EMT); Dr LASSONDE, Philippe (INRS-EMT); Dr SCHMIDT, Bruno (Few--cycle Inc); Prof. LEGARE, Franois (INRS-EMT); Prof. NAM, Chang Hee (Institute for Basic Science / Gwangju Institute of Science and Technology); Prof. KIM, Kyung Taec (Institute for Basic Science / Gwangju Institute of Science and Technology)

**Presenter:** Mr CHO, Wosik (Institute for Basic Science / Gwangju Institute of Science and Technology)
