Spectral Broadening of a 500W, 5mJ Femtosecond Laser

Monday 1 July 2019 18:15 (2 hours)

In this contribution, we present a significant up-scaling of the average power of stretched hollow-core-fibers by spectrally broaden 5 mJ, 500 W, 280 fs pulses in a 4 m long, 450 μ m inner-diameter fiber to a bandwidth supporting sub-17fs pulses.

Authors: Dr HÄDRICH, Steffen (Active Fiber Systems GmbH); Dr SIMON, Peter (Laser-Laboratorium Göttingen e.V.); Dr NAGY, Tamas (Max Born Institute for Nonlinear Optics and Short Pulse Spectroscopy); BLUMENSTEIN, Andreas (Laser-Laboratorium Göttingen e.V.); Mr KLAS, Robert (Helmholtz-Institute Jena); Mr BULDT, Joachim (Institute of Applied Physics); Mr STARK, Lars-Henning (Institute of Applied Physics); Dr BREITKOPF, Sven (Active Fiber Systems GmbH); Dr JÓJÁRT, Péter (ELI-ALPS, ELI-HU Non-Profit Ltd.); Dr VÁRALYAY, Zoltán (ELI-ALPS, ELI-HU Non-Profit Ltd.); Dr OSVAY, Károly (ELI-ALPS, ELI-HU Non-Profit Ltd.); Dr EIDAM, Tino (Active Fiber Systems GmbH); Prof. LIMPERT, Jens (Institute of Applied Physics)

Presenter: Dr HÄDRICH, Steffen (Active Fiber Systems GmbH)

Session Classification: Poster session 1
