Decoding Molecular Rotational Dynamics from High-harmonic Generation

Monday 1 July 2019 18:15 (2 hours)

By exploiting machine learning in high-harmonic spectroscopy, we have reconstructed the molecular rotational dynamics with femtosecond resolution from the angular distributions of high-harmonics measured at various time delays of the probe pulse.

Authors: Dr HE, Yanqing (Huazhong University of Science and Technology); Dr HE, Lixin (Huazhong University of Science and Technology); Prof. LAN, Pengfei (Huazhong University of Science and Technology); Dr WANG, Baoning (Huazhong University of Science and Technology); Dr LI, Liang (Huazhong University of Science and Technology); Dr ZHU, Xiaosong (Huazhong University of Science and Technology); Dr CAO, Wei (Huazhong University of Science and Technology)

Presenter: Dr HE, Yanqing (Huazhong University of Science and Technology)

Session Classification: Poster session 1
