Determination of the Ionization Time Using Attosecond Photoelectron Interferometry

Monday 1 July 2019 18:15 (2 hours)

We propose a novel attosecond photoelectron interferometer, which is based on the interference of the direct and near-forward rescattering electron wave packets, to determine the time information characterizing the tunneling process.

Authors: Dr TAN, Jia (Huazhong University of Science and Technology); Prof. ZHOU, Yueming (Huazhong University of Science and Technology); Dr HE, Mingrui (Huazhong University of Science and Technology); Prof. LI, Min (Huazhong University of Science and Technology); Prof. LU, Peixiang (Huazhong University of Science and Technology)

Presenter: Dr TAN, Jia (Huazhong University of Science and Technology)
