High Repetition Rate CEP-stable Yb-doped Amplifier for Attoscience

Monday 1 July 2019 18:15 (2 hours)

We report on a CEP-stable YDFA delivering 30 μJ , 100 kHz, 100 fs pulses at 1030 nm. The integrated CEP noise in the bandwidth [1 Hz; 50 kHz] is 325 mrad.

Authors: Mr NATILE, Michele (Amplitude Laser Group); Mr LAVENU, Loic (Amplitude Laser Group); Mr GUICHARD, Florent (Amplitude Laser Group); Mr HANNA, Marc (Université Paris-Saclay); Mr ZAOUTER, Yoann (Amplitude Laser Group); Mr CHICHE, Ronic (Université Paris-Saclay); Ms CHEN, Xiaowei (Amplitude Laser Group); Mr HERGOTT, Jean-François (Université Paris-Saclay); Mr BOUTU, Willem (Université Paris-Saclay); Mr MERDJIL, Hamed (Université Paris-Saclay); Mr GEORGES, Patrick (Université Paris-Saclay)

Presenter: Mr NATILE, Michele (Amplitude Laser Group)
