## Quantum dynamics of the Isomerization of Norbornadiene to Quadricyclane Induced by Strong Attopulses.

*Monday 1 July 2019 18:15 (2 hours)*

We investigate the [2+2]photo-cycloaddition of norbornadiene to quadricyclane by integrating the nuclear time-dependent Schrödinger equation for eight electronic states, coupled by nonadiabatic coupling and the interaction with an external electric field.
