First-principles Time- and Angle-resolved Photoelectron Spectroscopy

Monday 1 July 2019 18:15 (2 hours)

In this study, we will control the photoelectrons by introducing the excited Dirac cones, and show their flip-effects induced by IR (Infrared)-pump.

Authors: Mr KIM, Youngjae (Department of Emerging Materials Science, DGIST); Prof. LEE, Jae-Dong (Department of Emerging Materials Science, DGIST)

Presenter: Mr KIM, Youngjae (Department of Emerging Materials Science, DGIST)
