Harmonic Generation in Solids Using a Near IR Driving Field

Monday 1 July 2019 18:15 (2 hours)

In the present study, second harmonic generation (SHG) in thin ZnO crystal, pure MgO and Chromium (Cr) doped MgO crystals is investigated. We explore SHG dependence on the orientation angle between the crystal and laser polarization.

Authors: Mr HUSSAIN, Mukhtar (Universidade de Lisboa); Dr WILLIAMS, Gareth (Universidade de Lisboa); Dr BOUTU, Willem (LIDYL, CEA, CNRS, Universit Paris-Saclay, CEA Saclay); Dr FRANZ, Dominik (LIDYL, CEA, CNRS, Universit Paris-Saclay, CEA Saclay); Dr MERDJI, Hamed (LIDYL, CEA, CNRS, Universit Paris-Saclay, CEA Saclay); Prof. FAJARDO, Marta (Universidade de Lisboa)

Presenter: Mr HUSSAIN, Mukhtar (Universidade de Lisboa)

Session Classification: Poster session 1
