Attosecond Time Delays in Photoionisation of Noble Gas Atoms and Small Symmetric Molecules

Monday 1 July 2019 18:15 (2 hours)

Trains of attosecond pulses are suitable tools to unveil the ultrafast dynamics of electrons. Here we report the results of photoionization time delays in atoms and small molecules resolved over angle and energy of emission.

Authors: Mr MOIOLI, Matteo (University of Freiburg); Dr AHMADI, Hamed (University of Freiburg); Prof. SANSONE, Giuseppe (University of Freiburg); Dr PLÉSIAT, Etienne (Universidad Autónoma de Madrid); Dr PALACIOS, Alicia (Universidad Autónoma de Madrid); Dr FRASSETTO, Fabio (CNR-IFN Sede di Padova); Dr POLETTTO, Luca (CNR-IFN Sede di Padova); Dr BRAGHERI, Francesca (CNR-IFN Sede di Milano); Prof. OSELLAME, Roberto (CNR-IFN Sede di Milano); Dr SCHRÖTER, Claus Dieter (Max Planck Institute for Nuclear Physics); Dr MOSHAMMER, Robert (Max Planck Institute for Nuclear Physics); Prof. PFEIFER, Thomas (Max Planck Institute for Nuclear Physics); Prof. MARTÍN, Fernando (Universidad Autónoma de Madrid)

Presenter: Mr MOIOLI, Matteo (University of Freiburg)

Session Classification: Poster session 1
