## Photoionization Dynamics Probed by Attosecond Pulses

*Wednesday 3 July 2019 16:15 (30 minutes)*

We introduce the concept of photoionization time delay and present measurements in different atomic systems, with high spectral resolution. Both non-resonant and resonant photoionization dynamics will be considered.

**Author:** Prof. L'HUILLIER, Anne (Lund University)

**Presenter:** Prof. L'HUILLIER, Anne (Lund University)

**Session Classification:** Time delays and dynamics of photoionization in atoms and molecules
