## **Solid State Harmonics: Spatiotemporal Properties and Connection to Band Structure**

*Thursday 4 July 2019 08:30 (30 minutes)*

This talk will discuss how the laser-driven electron dynamics on the band structure are imprinted on the temporal, spectral, and spatial properties of solid-state harmonics.

**Author:** Prof. GAARDE, Mette B. (Louisiana State University)

**Presenter:** Prof. GAARDE, Mette B. (Louisiana State University)

**Session Classification:** High-harmonic spectroscopy and generation in solid materials
