Transient Attosecond Soft-X-Ray Spectroscopy in Layered Semi-Metals

Wednesday 3 July 2019 11:30 (15 minutes)

In this work we use a high harmonic light source capable of producing single attosecond soft-xray pulses to study the ultrafast electronic and structural dynamics of layered semi-metals.

Authors: Dr SIDIROPOULOS, Themistoklis (ICFO); DIPALO, Nicola (ICFO); RIVAS, Daniel (European XFEL); Mr SEVERINO, Stefano (ICFO); Dr REDUZZI, Maurizio (ICFO); Dr BUADES, Barbara (ICFO); LEON, Iker (ICFO); COUSIN, Seth (ICFO); HEMMER, Matthias (ICFO); COCCHI, Caterina (Humboldt-Universität Berlin); PELLEGRIN, Eric (ALBA Synchrotron); HERRERO MARTIN, Javier (ALBA Synchrotron); MANA-VALERO, Samuel (Instituto de Ciencia Molecular - ICMol); CORONADO, Eugenio (Instituto de Ciencia Molecular - ICMol); DANZ, Thomas (Universität Göttingen); DRAXL, Claudia (Humboldt-Universität Berlin); UEMOTO, Mitsuharu (University of Tsukuba); YABANA, Kazuhiro (University of Tsukuba); WALL, Simon (ICFO); PICON, Antonio (ICFO, Universidad Autonoma de Madrid); Prof. BIEGERT, Jens (ICFO, ICREA)

Presenter: Dr SIDIROPOULOS, Themistoklis (ICFO)

Session Classification: Ultrafast spectroscopy of electronic and magnetic processes in solids
