Towards Attosecond Photoemission Electron Microscopy: Ultrafast Dynamics on Gold Nanosponges

Friday 5 July 2019 11:30 (15 minutes)

We investigate the ultrafast dynamics on single gold nanosponges by imaging the random and long-lived localization of surface plasmons using time-resolved photoemission electron microscopy. The steps towards attosecond time resolution are discussed.

Authors: VOGELANG, Jan (Lund University); WITTENBECHER, Lukas (Lund University); MIKAEELSSON, Sara (Lund University); Dr GUO, Chen (Lund University); WANG, Dong (TU Ilmenau); SYTSEVICH, Ivan (Lund University); LANGER, Fabian (Lund University); ARNOLD, Cord L. (Lund University); L'HUILLIER, Anne (Lund University); Prof. MIKKELSEN, Anders (Lund University)

Presenter: VOGELANG, Jan (Lund University)

Session Classification: Mapping of ultrafast quantum dynamics in solids and liquids
