Controlled Asymmetric Photoelectron Emission Using Electron Wavepacket Interference

Thursday 4 July 2019 11:15 (15 minutes)

We demonstrate control of photoelectron emission in two-color photoionization through electron wavepacket interference, using attosecond pulse trains with either two or three pulses together with a few-cycle IR dressing field at a fixed delay.

Authors: MIKAELSSON, Sara (Lund University); CHENG, Yu-Chen (Lund University); NANDI, Saikat (Lund University); RÄMISCH, Lisa (Lund University); GUO, Chen (Lund University); HARTH, Anne (Lund University); VOGELSANG, Jan (Lund University); MIRANDA, Miguel (Lund University); ARNOLD, Cord L. (Lund University); L'HUILLIER, Anne (Lund University); GISSELBRECHT, Mathieu (Lund University)

Presenter: MIKAELSSON, Sara (Lund University)

Session Classification: Photoelectron-based probing of atomic and molecular states
