Attosecond Photocarrier Excitation in III-V Semiconductors

Monday 1 July 2019 18:00 (2 hours)

Using transient absorption spectroscopy, we investigate laser-induced attosecond electron dynamics in III-V semiconductors. We find a complex interplay between *intra*- and *inter*-band transitions in the transient response. Our findings are supported by *ab-initio* calculations.

Authors: Mr SCHLAEPFER, Fabian (ETH Zurich); Dr LUCCHINI, Matteo (Dipartimento di Fisica, Politecnico di Milano); Dr SATO, Shunsuke A. (Max Planck Institute for the Structure and Dynamics of Matter); Dr VOLKOV, Mikhail (Ludwig-Maximilians-Universität München); Dr KASMI, Lamia (ETH Zurich); Mrs HARTMANN, Nadja (ETH Zurich); Prof. RUBIO, Angel (Max Planck Institute for the Structure and Dynamics of Matter); Dr GALLMANN, Lukas (ETH Zurich); Prof. KELLER, Ursula (ETH Zurich)

Presenter: Mr SCHLAEPFER, Fabian (ETH Zurich)

Session Classification: Poster session 1
