Probing Molecular Influence on Photoemission Delays

Wednesday 3 July 2019 18:00 (2 hours)

Molecular photoemission delay includes contributions from electron birth process and its subsequent propagation within the molecular environment. Here attosecond streaking spectroscopy enabled disentangling these contributions facilitating to understand the influence of molecular environment on it.

Authors: Dr BISWAS, Shubhadeep (Ludwig Maximilians Universität); Dr FÖRG, Benjamin (Ludwig Maximilians Universität); Mr SCHÖTZ, Johannes (Ludwig Maximilians Universität); Dr SCHWEINBERGER, Wolfgang (Max Planck Institute for Quantum Optics); Ms ORTMANN, Lisa (Max Planck Institute for the Physics of Complex Systems); Dr ZIMMERMANN, Thomas (ETH Zürich); Dr PI, Liang-Wen (Max Planck Institute for the Physics of Complex Systems); Mr BAYKUSHEVA, Denitsa (ETH Zürich); Mr MASOOD, Hafiz (King Saud University); Dr LIONTOS, Ioannis (King Saud University); Mr KAMAL, Amgad (King Saud University); KLING, Nora (Ludwig Maximilians Universität); Dr ALHARBI, Abdullah (King Abdulaziz City for Science and Technology); Dr ALHARBI, Meshaal (King Saud University); Dr AZZEER, Abdallah (King Saud University); Dr WÖRNER, Hans Jakob (ETH Zürich); Dr LANDSMAN, Alexandra (Max Planck Institute for the Physics of Complex Systems); Dr KLING, Matthias (Ludwig Maximilians Universität)

Presenter: Dr BISWAS, Shubhadeep (Ludwig Maximilians Universität)

Session Classification: Poster session 2
