High Harmonic Generation in 2D and 3D Semiconductors

Wednesday 3 July 2019 18:00 (2 hours)

We present recent results on high harmonic generation in graphene and we study the dependence of the generation process on the band structure of 2D materials and bulk crystals through polarization spectroscopy.

Authors: Ms KAASSAMANI, Shatha (CEA Saclay); Dr GAUTHIER, David (CEA Saclay); Dr FRANZ, Dominik (CEA Saclay); Dr NICOLAS, Rana (CEA Saclay); Mr GOMES, Jean-Thomas (NOVAE); Mr LAVOUTE, Laure (NOVAE); Mr GAPONOV, Dmitry (NOVAE); Mr FÉVRIER, Sébastien (XLIM, CNRS); Prof. BOUTU, Willem (CEA Saclay); Prof. MERDJI, Hamed (CEA Saclay)

Presenters: Ms KAASSAMANI, Shatha (CEA Saclay); Dr GAUTHIER, David (CEA Saclay)

Session Classification: Poster session 2
