Artifact-free XUV Coherence Tomography by One-dimensional Phase Retrieval

Wednesday 3 July 2019 18:00 (2 hours)

We present XUV Coherence Tomography (XCT) driven by a high-harmonic light source. Using a novel One-dimensional phase retrieval algorithm, XCT enables non-destructive, artifact-free, nanoscale, cross-sectional imaging of silicon based samples, e.g., semiconductor devices.

Authors: WÜNSCHE, Martin (Friedrich Schiller University Jena); FUCHS, Silvio (Friedrich Schiller University Jena); NATHANAEL, Jan (Friedrich Schiller University Jena); ABEL, Johann J. (Friedrich Schiller University Jena); REINHARD, Julius (Friedrich Schiller University Jena); WIESNER, Felix (Friedrich Schiller University Jena); SKRUSZEWICZ, Slawomir (Friedrich Schiller University Jena); RÖDEL, Christian (Friedrich Schiller University Jena); PAULUS, Gerhard G.
