The Influence of Many-Electron Atoms Polarization in a Strong Laser Field on the High-Order Harmonic Generation

Wednesday 3 July 2019 18:00 (2 hours)

It is shown that polarization of many-electron atoms in an intense laser pulse may lead a screening of the laser field, which results the suppression of atom depletion and thereby enhances the high-order harmonic generation yield.

Authors: Mr ROMANOV, Alexander (Institute of Applied Physics, Russian Academy of Sciences); Dr SILAEV, Alexander A. (Institute of Applied Physics, Russian Academy of Sciences); Dr FROLOV, Mikhail V. (Voronezh State University); Dr VVEDENSKII, Nikolai V. (Institute of Applied Physics, Russian Academy of Sciences)

Presenter: Dr VVEDENSKII, Nikolai V. (Institute of Applied Physics, Russian Academy of Sciences)
