High-energy Ultrafast Mid-IR Optical Parametric Amplifier for Strong-Field Science

Wednesday 3 July 2019 18:00 (2 hours)

We present a high-energy mid-IR OPA tunable between 2.8 and 3.8 μm for strong-field applications. HHG driven by two-colour pulses was studied in atoms and molecules using this source.

Authors: Mr MUSHEGHYAN, Mikayel (High Q Laser GmbH and University of Kassel); Dr FACCIALA, Davide (IFN-CNR and Politecnico di Milano); Mr PRASANNAN GEETHA, Prabhash (IFN-CNR and Politecnico di Milano); Mr PUSALA, Aditya (IFN-CNR and Politecnico di Milano); Mr CRIPPA, Gabriele (IFN-CNR and Politecnico di Milano); Dr G. CIRIOLO, Anna (IFN-CNR and Politecnico di Milano); Dr DEVETTA, Michele (IFN-CNR and Politecnico di Milano); Dr VOZZI, Caterina (IFN-CNR and Politecnico di Milano); Dr STAGIRA, Salvatore (IFN-CNR and Politecnico di Milano)

Presenter: Mr PRASANNAN GEETHA, Prabhash (IFN-CNR and Politecnico di Milano)
