High Resolution Mass Spectrometry and Velocity Map Imaging for Ultrafast Electron Dynamics in Biomolecules

Wednesday 3 July 2019 18:00 (2 hours)

We present a new design and characterization of a velocity-map-imaging electron spectrometer combined with a reflectron mass spectrometer. Together with attosecond and femtosecond pump-probe methods it will enable studies of ultrafast dynamics in large molecules.

Authors: Mr SARASWATHULA, Krishna Chaitanya (Center for Free-Electron Laser Science (CFEL), DESY); Dr MAANSSON, Erik (Center for Free-Electron Laser Science (CFEL), DESY); Dr TRABATTONI, Andrea (Center for Free-Electron Laser Science (CFEL), DESY); Dr CARTELLA, Andrea (Center for Free-Electron Laser Science (CFEL), DESY); Mr WANIE, Vincent (Institut National de la Recherche Scientifique); Ms GALLI, Mara (Center for Free-Electron Laser Science (CFEL), DESY); Mr COLAIZZU, Lorenzo (Center for Free-Electron Laser Science (CFEL), DESY); Dr FRASSETTO, Fabio (Institute for Photonics and Nanotechnologies, National Research Council); Prof. POLETTI, Luca (Institute for Photonics and Nanotechnologies, National Research Council); Prof. LÉGARÉ, François (Institut National de la Recherche Scientifique); Prof. NISOLI, Mauro (Politecnico di Milano); Prof. CALEGARI, Francesca (Center for Free-Electron Laser Science (CFEL), DESY)

Presenter: Mr SARASWATHULA, Krishna Chaitanya (Center for Free-Electron Laser Science (CFEL), DESY)

Session Classification: Poster session 2
